EDUCATION

SRM Institute of Science and Technology (SRMIST)

B.Tech in Computer Science and Engineering (Cloud Computing) – CGPA: 9.72/10 (up to 5th Semester) Aug 2023 – May 2027 (Expected)

Cambridge Court World School

Higher Secondary Certificate (Class XII)

Chennai, India

Jaipur, India

Graduated 2022

EXPERIENCE

Software Engineering Intern

June 2025 – Present

The Yotribe

Lucknow, India

- Built and shipped full-stack features in React and Node.js across active sprint cycles, directly reducing API response latency by optimising request batching and eliminating redundant network calls
- Resolved critical production bugs under live-user conditions; participated in daily standups, peer code reviews, and sprint retrospectives in a cross-functional Scrum team

Internship Trainee

July 2024

Darby Telematics

Bengaluru, India

- Ingested and processed real-time GPS and CAN bus sensor streams for an IoT-based vehicle fleet tracking platform, improving data pipeline reliability and reducing dropped-packet incidents during peak load
- Assisted firmware testing and diagnosed hardware-software integration failures, cutting system downtime during test cycles and accelerating the debug-to-deploy loop

PROJECTS

ADMRI – Adaptive Digital Mental Health Risk Index | React, Node.js, PostgreSQL, TensorFlow.js, NLP |

- Designed a clinician-facing paediatric dashboard where a 4-model in-browser neural ensemble (TensorFlow.js) fuses PHQ-9, GAD-7, ISI, and SCARED scores with NLP sentiment analysis into a single 0–100 risk score, adding Monte Carlo Dropout confidence intervals to surface model uncertainty for clinical decision-making
- Delivered SHAP feature-importance visualisations, longitudinal risk trajectories, automated email alerts on risk spikes, a CBT chatbot, and FHIR R4 export – enabling direct EHR interoperability without data re-entry

Real-Time Voice Translator | FastAPI, Whisper, NLLB-200, gTTS, React |

- Built an end-to-end multilingual voice translation pipeline using OpenAI Whisper for speech-to-text, Meta NLLB-200 for neural translation across 200+ languages, and gTTS for speech synthesis, all served via a FastAPI streaming backend
- Designed the system for sub-3-second end-to-end latency on CPU inference, with a React frontend enabling live audio capture, language selection, and real-time translated audio playback

DRAMS – Disaster Resource Management & Allocation | React, Node.js, MySQL, Leaflet.js |

- Developed a full-stack geospatial platform for real-time disaster resource allocation featuring interactive Leaflet.js maps, live asset tracking, and priority-based dispatch logic across concurrent incident scenarios
- Designed a normalised MySQL schema with indexing strategies tuned for write-heavy concurrent workloads, sustaining query performance under simulated multi-agency incident load

Multi-Disease Prediction System | Python, Scikit-Learn, XGBoost, Streamlit |

- Trained and benchmarked Random Forest, SVM, and XGBoost classifiers for diabetes, heart disease, and Parkinson's prediction; XGBoost achieved 97.4% accuracy on held-out test sets with 5-fold cross-validation
- Deployed an interactive Streamlit dashboard enabling real-time inference with SHAP-based model explanations, making predictions interpretable for non-technical clinical users

ClinicSight – Clinic Management System | React, Node.js, Express, MySQL |

- Built role-based dashboards for admins, doctors, and patients with appointment scheduling, patient record management, and real-time status updates; JWT authentication with refresh-token rotation secures all API routes
- Optimised MySQL queries with composite indexes, reducing dashboard load time by ~40% under concurrent multi-user access compared to the baseline ORM-generated queries

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, Java, C/C++, HTML5, CSS3

Web & Backend: React, Node.js, Express.js, FastAPI, REST APIs, JWT, WebSockets

AI & ML: TensorFlow, TensorFlow.js, Scikit-Learn, XGBoost, Whisper, NLLB-200, NLP, SHAP

Databases: MySQL, PostgreSQL, MongoDB, Firebase

DevOps & Cloud: Git, GitHub, Docker, AWS (MLA-C01, SAA-C03), Oracle Cloud, Netlify, Vercel

Tools: VS Code, Postman, Figma, Leaflet.js

CERTIFICATIONS

AWS Certified Machine Learning Engineer – Associate – Amazon Web Services

AWS Certified Solutions Architect – Associate – Amazon Web Services

Oracle Cloud Infrastructure 2025 AI Foundations Associate – Oracle

Oracle Cloud Infrastructure 2025 Foundations Associate – Oracle
